**\*\*\*This is an old resume, and I am in the process of making a new one**

**Old scholarship resume site I made:**

<https://codepen.io/Msde7/full/bGvzzMV>

## DEGREE

**Lebanon High School: 9th-12th**

**IU Bloomington Computer Science & Mathematics: Active**

## ACTIVITIES

### **Founded/Ran Sustainability Club 11th-12th**

Compounding upon my experiences in community service and food rescue I founded this club Junior year to make my school and community a less wasteful place. I pitched the club to my AP Environmental teacher, gathered signatures, met with the principal, and went on to lead it. We have ~25 members and organized E-Waste drives, led trash clean-ups, installed bird feeders, worked on a project on the big four trail, and composted waste within our school.

### **Band (Marching Band, Jazz Band, Pit Band, etc.) 6th-12th**

I joined band in the 6th grade as a Tuba player and picked up bass guitar and even bass trombone throughout the years. As a section leader, I have participated in wind ensemble, pit band, jazz band, district band, paid gigs, ISSMA, jazz combo, community band, and marching band. Band has been something I have always excelled at, and playing foundational instruments, while not always the most notable, allows me to help support others and give a piece a fuller sound. It was hard when the situation with my first high school band director getting fired happened, and sometimes with the marching band,

---

I would be there for 40+ hours a week, and it would start to tire me, but nevertheless, I have persevered, and it only made me stronger. Following high school, I wish to continue my passion for music and use it to help provide entertainment for my community.

### **School Leadership 9th-12th**

I first joined student council and class council freshman year, allowing me to help organize events such as dress-up days, homecoming floats, and most recently, graduation, where I am part of candelabrum. Lebanon Youth Council was also just started this year, which I recently joined, and I am looking forward to more involvement across the community. Overall it has been a great experience, and I have enjoyed getting to make connections in the administration.

### **Community Service Clubs 9th-12th**

Throughout high school, I have been involved in Key Club, Ambassador's, and NHS. They have allowed me to get out in my community and help others around me while forging lasting connections.

### **Diving 12th**

Going into Senior year, I decided I wanted to make it as interesting as possible. I took a lot of hard classes and got involved in new activities, one of which was diving. It required a lot of dedication coming into the school at 6 a.m. to smack my body against water in a speedo for an hour. Regardless, it taught me a lot and allowed me to apply my knowledge of physics to improve myself.

### **Self-Taught Coding 10th-Present**

The first time I actually used coding was in first grade, but it was years later that I discovered my love for it. It began as a means to an end. I wanted to make a game, but code was a huge hindrance. Thus, I stopped making the game and instead taught myself how to code. I quickly fell in love with coding and the power it gave me. It was like a language, allowing me to express myself and complement my other interests. Every problem was like a logic puzzle, and I was and still am infatuated with it. Throughout my coding journey, I have gained experience in Java, Javascript, HTML, CSS, Python, 3.JS, React (lightly), and C.

## WORK EXPERIENCE

### **ARC of Greater Boone County** - *Assistant*

Summer of 2019

Just a short summer job where I made minimum wage, but it taught me a lot about work ethic and saving.

### **Moe's Southwest Grill** - *Team Member*

2019-2021

This was my first "real" job where I worked upwards of 24 hours a week. This job specifically taught me a lot about dealing with customers and remaining calm under stressful situations.

### **Menards** - *Receiving Team Member*

2021-2022

I took this job to shake things up, and it came with increased pay and a very different experience. I learned a lot about retail, safety practices, and even sales techniques. It was a great job, and I had some managers who I really miss.

### **Papa John's** - *Delivery Driver*

2022-2023

This job was another shake-up and is my favorite and probably last job in high school. There is a decent amount of budgeting involved, which has further developed my work ethic. I am blessed to have worked around such great people these past few years.

---

### **Cox Exploratory Scholar - *Peer/Academic Coach***

2023-Present

In my job I help to give career and academic advice to University Division students.

## **AWARDS**
